GRC Analyst | Information Security | ISO 27001 | Risk & Compliance

Professional Summary

Information Security Analyst with 6+ years of experience supporting cybersecurity, risk management, and IT operations. Strong knowledge of ISO/IEC 27001 and NIST frameworks, with hands-on experience in vulnerability management, access control, and audit support. Skilled in risk identification, control validation, and security operations. Currently expanding knowledge in SOC 2 and cloud security (AWS) to support GRC and compliance initiatives.

Core Skills

- Governance, Risk & Compliance (GRC)
- ISO/IEC 27001 & NIST Frameworks
- Risk Assessments & Risk Register Tracking
- Security Controls & Control Testing
- Audit Support & Evidence Collection
- Vulnerability Management & Remediation Tracking
- Access Control & Identity Management (IAM)
- Security Policies & Procedures
- Endpoint & Network Security
- AWS IAM Fundamentals

Professional Experience

Information Security Analyst / Engineer
Maint-SOC | Austro Bank | Credimatic | ANDEC
2016 – 2022

- Supported implementation and monitoring of ISO 27001 and NIST-aligned security controls
- Conducted vulnerability assessments and tracked remediation to reduce risk exposure
- Performed access control reviews and supported identity and privilege management (PAM)
- Assisted in audit readiness by collecting evidence and validating control effectiveness
- Maintained and supported security tools including DLP, VPN, and endpoint protection
- Collaborated with IT and security teams to improve compliance and security posture

Penetration Testing Consultant
VITAPRO Ecuador S.A.
2022

- Performed vulnerability assessments and basic penetration testing activities
- Documented findings and provided remediation recommendations
- Supported risk analysis by identifying and reporting security gaps

Customer Engineer / Field Technician
NCR Voyix | Insight Global | Super PC Systems
2023 – Present

- Support secure network and endpoint environments for enterprise clients
- Troubleshoot systems, ensuring operational stability and secure configurations
- Assist in maintaining compliance with security standards and internal procedures

Education

Master of Science in Information Security – ESPOL
Bachelor of Science in Systems Engineering – UPS

Certifications

- ISO/IEC 27001 Internal Auditor
- CompTIA Security+ *(In Progress)*
- Certified Ethical Hacker (CEH v13) *(In Progress)*
- Cisco CCNA 1–3
- Linux System Administration

GRC & Compliance Knowledge

- Familiar with SOC 2 Trust Services Criteria (Security, Availability, Confidentiality)
- Understanding of audit processes, control testing, and evidence collection
- Experience with risk identification, risk scoring, and mitigation tracking
- Knowledge of access reviews, policy enforcement, and compliance documentation

Tools & Technologies

- Vulnerability Scanning Tools (Nessus/OpenVAS – exposure)
- SIEM (basic exposure)
- Endpoint Security & DLP Solutions
- Identity & Access Management (IAM / PAM)
- Networking & Infrastructure Support
